PROYECTO VALLE DE CACAULAPA
CATALOG FORM

DATE: 29 May 2000

LOT NUMBER: 8A/013

SUBSTANCE: Greenstone

OBJECT: Hacha

CATALOG #: 8A/013 - 50

MULTIPLES?

DRAWN BY: J

PASTE GROUP (for ceramics):

EXCAVATOR: 18

CATALOGED BY: J

MAXIMUM--HGT/LENGTH: 55.2 mm

WIDTH: 41.0 mm

THICKNESS: 19.6 mm

VERBAL DESCRIPTION:

This is a complete hacha

It is: complete - incomplete.

If incomplete, specify the segment preserved:

The item: is is not decorated. If decorated, describe location and nature of decoration:

The item is: not eroded - slightly - moderately - extremely - eroded.

The item is: not drawn - drawn. Where? on reverse

Comments: This hacha is well-smoothed to polished on all surfaces. The butt end has some pecking marks deeper than the smoothing, localized on one edge. The blade has one large chip (0.45 x 0.32 cm), and some very small chips on half its length. To me, the small chips look like they are the remains of use wear, as though the item had been reground along the edge. The large, flat sides show the typical mottled green, with flecks ranging from almost black to pale green. Unusually, the butt end ~~looks~~ looks different in color, much paler, as though that end had a concentration of the paler particles. The 2 flat edges are also a bit paler than the large, flat ~~sides~~ sides.
